Your Resource for Success

www.SynergyResources.net

Financial Application Consultant

Synergy Resources is looking for an experienced Financial Application Specialist to join their professional services organization. Synergy Resources provides comprehensive ERP and Financial Software Implementation services to its client base.

Synergy Resources is a leading provider of ERP software and business consulting services for the mid-tier manufacturing and distribution market. We are currently looking for an experienced individual with demonstrated client service skills to help us support our growing client base.

Responsibilities include:

- Assume overall project management for the implementation of Financial Software
- Analyze and document current state business processes
- Develop and document future state processes using the financial software functionality, reporting and procedures.
- Assess the need for client specific application and report customizations
- Define and document functional requirements for customizations
- Provide Product training and knowledge transfer to client

Qualifications:

- Bachelors Degree from an accredited business school with emphasis on accounting/finance desired. Minor in Information Systems or CPA is a plus.
- Employment as a controller/accounting manager in private industry
- Direct hands-on experience in implementing and maintaining financial systems (Microsoft Great Plains or Solomon). Experience in Infor Visual Standard Financials or Global Financials is a plus.
- Knowledge of Cost Accounting concepts
- Experience with providing software related training and consulting support to end-users.
- Familiarity with a SQL (MS Access and MS SQL Server) or Crystal Reports is a plus
- Proficiency in Microsoft Word, Excel, PowerPoint and Outlook
- Excellent communication, collaboration and interpersonal skills.
- Outstanding analytical and problem solving skills.
- Highly accomplished project management skills with a proven track record.
- Ability to successfully manage challenging client expectations on complex business issues.
- Experience within a Manufacturing or Distribution environment is preferred
